

## MEGA

### Product Overview

Our MEGA gypsum is a gypsum-based product for working with thin layers (up to 4 mm thickness) on concrete surfaces.

MEGA

25 kg

Packaging Available

6 Months

Shelf Life

#### Directions & Recommendations:

- Clean the concrete surface intended for application.
- Put the amount of clean water specified (1 part) in a clean mixing bowl and add the powder (2 parts) in gradually.
- Stir well until completely homogenous.
- Use freely as needed.

#### Advantages:

- Suitable for use on concrete surfaces, buildings, walls, and ceilings.
- Allows for a smooth surface that can be cleaned with water.
- Can be considered a final surface without paint and can be coated with various types of paints.
- Great workability.
- Sustainable.

### Technical Specifications:

Color	White
Density (kg/L)	0,99 ± 0,02
Setting Time	45 min
Water to Powder Ratio	2:1
Average Consumption	1 m <sup>2</sup> (1,0 mm layer thickness) per 1,25 kg.
